

E-Safety

Personal Information

Personal information includes all things that are true about a person.

Not safe to share online: Name (Jason), where you go to school, where you live, date of birth.

Safe to share online: Pets, favourite food, favourite colour, favourite toy.

Email

People use computers, phones or tablets to send **emails**. This is like a letter sent digitally through the Internet.

Emails are sent instantly through a computer network.

Emails can take just seconds to go from one computer to another. An **email** can travel to a computer on the other side of the world through the **Internet**.

Many adults use **email** every day. You can start using email on your own when you get a little older. If a child uses email, it is important they do this with a responsible adult.
